The incarnated leaders of Benfeitor Centre receive all of session fluids emanated from the good spirits. The good spirits are counselors and inspire good feelings, repulsing bad thoughts, vanity, selfishness and proud. Negative thoughts cause illness and attract the imperfect spirits who distils suffering according their own weaknesses. The bad spirits harass their disaffections generally constructed when they were incarnated on Earth. After disincarnation, they don't understand instantaneously their new condition and feel magnetized by situations or relations previously lived, and try as much as possible return to their family in the matter.

The history has a lot of examples of home disasters, perturbation and severe influence in the psyche health, achieving the children and sensitive people whose live together.

So, we strongly recommend the practice of pray and reading once a week of the Gospel According the Spiritism. This book contains all the wisdom prescribed by the spirits who achieved the perfection.
